## ABOUT ME

---

Specializing in JavaScript, HTML, React, and CSS, I have a proven track record of developing user-friendly and functional web applications, my experience extends to TypeScript and JSON Server, allowing me to create robust and scalable solutions. Utilizing modern web technologies, I strive to deliver innovative results while maintaining a keen attention to detail. My strong problem-solving skills enable me to contribute effectively to diverse projects.

City: Baku | Country: Azerbaijan | Website: <https://alohaworld.az/az/>

## PROJECTS

---

[ 01/03/2024 – 11/03/2024 ]

### "New Entrepreneur in Entrepreneurship Ecosystem through Empowerment of Young People" in Turkey

During the Erasmus+ project, I learned about business stuff like business canvas, thinking analytically, and solving problems. There were 45 of us from eight different countries, and talking with them helped me get better at languages and expressing myself.

[ 30/09/2024 – Current ]

### State Employment Agency Website

Role: Frontend Developer

I am working in a collaborative team to develop a user-friendly web application for the State Employment Agency, aimed at helping individuals find jobs that match their skills, qualifications, and personal preferences. Utilized React for the frontend, ensuring a responsive and interactive user interface. Collaborated on version control via GitHub, following best practices for code management and deployment. Contributed to implementing key features such as job search filters, user profiles, and personalized job recommendations based on user inputs.

Key Technologies: React, GitHub, JavaScript, HTML/CSS, APIs
